This is your "Perry Mason" Moment: The Infamous Alex Jones Inadvertent Cell Phone Production Explained

This CLE is geared toward litigators, litigation support teams, and paralegals responsible for managing clients' sensitive data. The presenters will examine in detail the very public and particularly devastating inadvertent production (and failed clawback) in the Alex Jones trial. Focusing on the technological mechanics of how it happened and the legal procedure that prevented a clawback, this program will equip attendees with the tools and knowledge to avoid putting their clients in the same position.

Date/Time: September 29, 2022 | 11:30-12:30pm CT
