

Digital Health

Positioning companies at the forefront of digital health technology.

As health care providers look to expand beyond physical service offerings into telehealth and telemedicine, Spencer Fane Digital Health attorneys help them understand and respond effectively to the complex legal and regulatory issues emerging alongside evolving technologies.

Overview

Providing timely, relevant advice in a rapidly evolving technological and regulatory landscape

Working with established as well as emerging health care companies, Spencer Fane Digital Health attorneys help clients navigate state and federal legal and regulatory matters, assess and mitigate business and data privacy risks, and grow their digital health footprint.

Our firm's comprehensive Digital Health industry team includes experience advising on:

- **Health data and privacy**
- **Emerging care models**, including telehealth, remote monitoring and diagnostics, hospital-at-home, and other remote site care delivery systems.
- **Vendor contracting**
- **Risk assessment**
- **Health system operational integration**
- **Regulatory compliance matters** extending from state and federal law to FDA regulation.

Our Digital Health lawyers address fraud and abuse considerations in contracting and operations, provider licensing, and billing and coding to ensure that clients avoid regulatory traps and to proactively identify potential areas of concern.
