

SpencerFane®

Life Sciences

Supporting your products from “lab bench to bedside.”

From agricultural products, biologics, biotech, diagnostics, and pharmaceuticals to medical devices, digital health, veterinary technologies, and more, the Spencer Fane Life Sciences team advises owners, investors, manufacturers, and others along the distribution chain in the development and protection of products and technologies from the early startup and commercialization stage through the life cycle of the product.

Overview

Effective strategies for speeding innovations to market

With the resources to represent innovators in virtually every aspect of technology development, commercialization, and protection, the Spencer Fane Life Sciences team assists you by creating the legal and commercial infrastructure to monetize and commercialize life sciences discoveries and technologies. We help you protect your intellectual property at every phase. And we are there to protect your products and investment when challenges arise from regulatory agencies, government investigations, litigation, mass actions, and other disputes.

Our team includes attorneys with a depth of experience in:

- **Corporate formation and governance**
- **Intellectual property**
- **International transactions, commerce, and disputes**
- **Financial services**
- **Venture capital**
- **Private equity**
- **Antitrust**
- **Unfair competition**
- **Real estate**
- **Trade secrets**
- **Labor and employment**
- **Employee benefits**
- **Litigation and dispute resolution**
- **Product liability**
- **Government enforcement**
- **False Claims Act**
- **Business restructuring**
- **Environmental**

With our deep reservoir of legal, scientific, and business acumen, we not only help you reach the market efficiently, but we support you every step of the way in mitigating and addressing risks in all aspects of your business.
