

SpencerFane®

Allen Darrah to Speak at ACI Conference

October 9, 2025

Hilton Garden Inn Washington, D.C./Georgetown Area | 2201 M St NW, Washington, DC 20037

Spencer Fane Chief Information Officer (CIO) **Allen Darrah** will be a featured speaker at the American Conference Institute's (ACI) national event on October 8-9 in Washington, D.C. This conference will showcase how to operationalize AI with real-world insights on governance innovation, algorithms, and privacy and security.

On the second day of the conference, Allen will cover developing an AI action plan with privacy, data, and cybersecurity considerations. The session aims to empower participants to create an action plan that is tangible and tactical while incorporating effective AI strategy.

As CIO, Allen leads the firm's digital transformation, aligning legal services with modern cybersecurity, AI integration, and exceptional client service. Along with his role at Spencer Fane, Allen is a faculty instructor at Columbia University's School of Professional Studies and a regular speaker on digital trust, innovation strategy, and operational resilience. He also maintains his role as Chief Information Security Officer, ensuring stringent protection of client data and privacy.
