Christine Chasse Explores AI in Health Care for HIMSS Information Technology Day

Spencer Fane attorney [Christine Chasse](#) was a panelist for Texas Health Information Technology Day – an HIMSS Dallas-Fort Worth Chapter event – on March 30 in Austin, Texas.

Christine joined Dr. Zeke Silva of South Texas Radiology and Dr. Brett Moran of Parkland Health for the session, AI in Clinical Practices. They discussed the use of artificial intelligence in clinical workflows, decision-making, and patient care while also exploring key challenges such as data quality, privacy, ethics, and regulatory considerations.

At Spencer Fane, Christine maintains a dual-focused practice at the intersection of cybersecurity and health care, advising clients on emerging legal risks while providing pragmatic, business-forward guidance. She supports a range of clients – from health systems to technology providers – in navigating complex regulatory frameworks, responding to high-stakes incidents, and structuring effective litigation strategies. Christine's clients benefit from her nuanced understanding of both the legal landscape and the day-to-day realities of working within a health care organization.
