

Critical Planning: Timeline and Lifecycle of Responding to a Ransomware Attack

Spencer Fane attorney [Shawn Tuma](#) recently presented at the INTERFACE Dallas Oklahoma virtual conference, covering the lifecycle of a ransomware attack.

In his presentation, Shawn discussed ways to protect against ransomware attacks. As one of the most prominent forms of cybercrime, Shawn emphasized the need to be prepared for these threats by backing up segmented data outside of your network and regularly installing security updates.

Shawn addressed each phase of a cyber threat, including:

- How they happen
- The process for recovery and investigation
- How to prepare for and hopefully prevent these threats

In his practice, Shawn routinely leads companies through ransomware attacks, including the cyber incident and data breach response process.
