

## Gene Eckel Outlines Changes to NAA Lease in Private Training

Spencer Fane attorney [Gene Eckel](#) presented on the latest changes to the National Apartment Association's (NAA) Click and Lease Program during a lunch and education session with the Apartment Association of Nebraska (AAN) on July 12 in Omaha, Nebraska.

During his presentation, [NAA](#) Click & Lease Updates, Gene walked the audience through the 2023 changes to the NAA's Click and Lease Program. Property management and leasing can put real pressure on teams to ensure they are following the many laws dictating rental housing, and the NAA Click & Lease program can guide the leasing team through automated lease generation and give helpful tips regarding tenant law.

Gene advocates for clients to find successful resolutions to complex litigation matters, helping them to navigate potentially damaging exposure to both operations and reputation in the multifamily industry. He serves on the board of directors AAN and the Nebraska Association of Commercial Property Owners and is a member of both the Legislative and the Affordable Housing Committees for the NAA.
