# Ingram's Magazine Recognizes Spencer Fane Among Fastest-Growing Businesses

Spencer Fane is proud to announce its inclusion in the *Ingram's* Magazine 38th annual Corporate Report 100 (CR100), a listing of the fastest-growing businesses in the region.

As a firm that has intentionally grown its platform to meet clients where they are doing business, it is a privilege for Spencer Fane to be recognized alongside many of the same businesses that Spencer Fane advises.

The report uniquely places the firm not with peer law firms but among a full spectrum of businesses ranging from technology companies to manufacturing businesses to health care entities and financial services institutions. In its fourth year of inclusion in the report, Spencer Fane is also the fastest-growing law firm included in the ranking and one of only two included.

"With more than a score of practice groups operating from nearly two dozen offices nationwide, Spencer Fane is all about the business of business law," *Ingrams* reports. The magazine also notes that while "fast growth of this scale tends to be the province of young companies bursting out of the gate," the firm is one of "six entities [on this year's CR100] that are well into their second century of operations."

*Ingram's* is a leading publication that covers business, industry, and economic development trends throughout Kansas and Missouri. In addition to this latest recognition, Spencer Fane was voted Best Law Firm in *Ingram's* Best of Business edition earlier this year.

Spencer Fane was also recently highlighted in *The American Lawyer*, *The National Law Journal*, and *Law360's* rankings for its strategic growth into new markets. The

firm's growth has been made possible by attracting and retaining an exceptionally talented team of attorneys across its footprint, while also remaining committed to a culture centered on core values of humility, collaboration, and inclusivity.
