Spencer Fane Team to Discuss Asset Protection in HCCA Webinar

Spencer Fane attorneys Sean McKenna, [Vincent Aiello](#), and Lauren Nelson will conduct an asset protection webinar for the Health Care Compliance Association (HCCA) on December 14.

The presentation, *Asset Protection in an Era of Enforcement*, will examine enforcement and liability trends in the health care industry, discuss the potential impacts of asset forfeiture and litigation on income and retirement, and provide insights on legal avenues that ensure asset preservation. The webinar is part of the HCCA's frequent online compliance training opportunities that allow health care professionals to earn and maintain certifications as well as stay informed on current industry trends.

At the firm, Sean focuses his practice on solving clients' health care needs and representing companies and executives in white-collar cases and investigations. He utilizes his almost 24 years of experience handling and defending health care and white-collar enforcement actions, as well as offering fraud and abuse insight and analysis.

Vincent helps business owners solve legal problems to secure revenue flow and reduce business risks. His client base spans a broad spectrum of businesses including household-name consumer brands, banks, construction companies, and family ventures.

Lauren litigates across the country on behalf of health care providers and executives, including hospital systems, physicians, rehabilitation centers, and other providers, in complex medical malpractice actions, licensing matters, and other business disputes.
