## Overview

**Blake's practice focuses on securities, corporate governance, restrictive covenants, and intellectual property. In those areas, he represents founders and executives, early-stage or established companies, registered investment advisors, private funds, trustees, and lenders.**

While the bulk of his practice is litigation, he also advises on transactional and regulatory matters that fall within these areas of experience.

Given his matters often require extensive pre-dispute investigation, he helps structure and commence internal investigations on behalf of corporate clients to assess the cost and benefits of bringing or resolving claims.

Blake has developed deep relationships with many attorneys at the firm in different practice areas, industries, and regions – if he isn't the right attorney for your matter, he can find you the attorney who is.
