Overview

Christina Ondrick is an accomplished trial lawyer who focuses on patent litigation in nearly every significant patent jurisdiction, including the International Trade Commission, District of Delaware, Northern District of California, Eastern District of Texas, Eastern District of Virginia, and the Court of Appeals for the Federal Circuit. Christina has litigated patent cases for over 20 years, including as co-lead counsel in over ten lawsuits that went to trial.

Christina specializes in complex infringement cases and has achieved numerous successes in a range of technical fields including telecommunications, semiconductors, consumer electronics, medical devices, metallurgy, robotics, power tools, and static displays. In addition, she has extensive experience in handling trade secret, unfair competition, and antitrust claims. Christina is experienced in managing and coordinating multijurisdictional disputes that involved parallel actions in district courts, the ITC, USPTO and foreign jurisdictions. She works with diverse clients and cases that range from high-profile, competitor versus competitor “bet the company” litigations for Fortune 500 companies to smaller litigations for rapidly growing businesses.

Christina’s trial skills have garnered recognition from *The Legal 500*, *IAM 1000*, *Lawdragon Leading 500 Lawyers in America* and *Super Lawyers*. *IAM 1000* recognized Christina for her “ability to quickly grasp complex technologies and devise winning arguments for clients in patent infringement suits.” She is also a speaker and thought leader concerning intellectual property developments.

Christina is the Moderator for the Washington, D.C. Chapter of ChIPs, an organization dedicated to advancing and connecting women in technology, law and policy. She is also a leading member of ChIP’s Innovation Initiative, which seeks to advance women inventors and innovators.

Prior to her legal career, Christina was an engineer working in the oil, gas and specialty chemical industries, providing engineering services to chemical, petrochemical, and energy companies. She advised clients on engineering design, risk reduction, and loss prevention.
