Overview

Holly Vandrovec provides practical, nuanced counsel to landowners, utilities, oil and gas operators, and related businesses navigating a complex regulatory framework, employing a skill set rooted in diverse public and private sector experience to achieve beneficial resolutions for her clients. She also serves as a mediator, bringing together disparate perspectives to facilitate resolution.

Prior to her return to private practice, Holly served as an administrative law judge for over a decade at the State Office of Administrative Hearings (SOAH) in Austin, Texas, and also served as the agency's Alternative Dispute Resolution (ADR) team leader. Her in-depth experience presiding over a wide range of complex cases while managing a team of mediators underpins her current practice, in which she works with multiple parties and perspectives to both advocate for clients and successfully mediate cases. Although she maintains a focus on utilities matters and ADR work, she also boasts experience assisting business transaction and litigation teams across several sectors, including complex commercial and oil and gas litigation.

Related Experience

- Successfully mediated multibillion-dollar matter involving a proposed system resiliency plan filed with the Public Utility Commission of Texas and referred to SOAH.
- Successfully mediated billion-dollar matter involving a system resiliency cost application addressing discrete severe weather events filed with the Public Utility Commission of Texas and referred to SOAH.
- Presided over multiple hearings in cases involving applications to amend certificates of convenience and necessity (CCNs) for transmission lines.
- Negotiated CERCLA Consent Decree with Department of Justice and State of Oklahoma on behalf of alleged arranger in matter implicating petroleum exclusion at Superfund site in Oklahoma.
- Performed waste characterization for chromium processing plant, including in-process materials and application of RCRA recycling exemption and Bevill exclusion for wastes from the extraction, beneficiation, and processing of ores and minerals.
- Negotiated amendment to a consent decree over objection of citizen groups enabling transfer of a coal-fired electric plant under construction and later valued at over \$1 billion.

- Performed environmental due diligence for purchaser of a number of kaolin mines in Georgia and South Carolina. Required the purchaser to obtain advanced approval from state environmental agencies before many permits (including Title V permits, NPDES permits, Radioactive Materials Licenses, and mining permits) could be transferred pursuant to the Asset Purchase Agreement. Worked with multiple state agencies to successfully obtain approval and transfer of all permits on a short timeline so the transaction could close.
- Represented group of landowners in negotiating oil and gas leases for over 11,000 acres of land in the Eagle Ford shale and bonus payments totaling over \$18 million.
