Overview

Jessica Merrigan is a partner in the Kansas City and Overland Park offices of Spencer Fane. She counsels clients on environmental matters regarding regulatory requirements and represents them in litigation of environmental claims, including contribution claims under the federal Superfund law.

She has significant experience helping clients in administrative negotiations with both the Environmental Protection Agency and state agencies, advises them on additional or equivalent state law requirements, and assists clients with facility audits, compliance initiatives, and waste reduction programs.

Throughout her career, Jessica has worked with clients to monitor the ongoing changes in chemical regulations and implement programs to manage evolving state, local, and federal requirements for chemical management, disclosure, and research.

Jessica advises clients in the complex permitting, operations, and reporting processes of federal and state regulatory programs. This includes obtaining, defending, and modifying Clean Air Act permits to support companies through changing operations and changing legal requirements.

Jessica also helps clients with environmental issues involved in property redevelopment and real estate transactions. Her work includes review of environmental assessments, evaluation of potential environmental liabilities associated with real estate transactions including those created by CERCLA, and evaluation of eligibility for federal and state Brownfields assistance programs. In addition, she works with clients to transfer and maintain permits, through the completion of appropriate plans and applications and coordination with responsible agencies. Her experience has included national, regional and local projects ranging from single-site sales to transactions involving hundreds of millions and up to \$2 billion in assets.

Education

- Washington University School of Law, 2003 (J.D.)

- University of San Diego, 2000 (B.A., Chemistry)

Related Experience

- Represented participant in multiparty Superfund site during negotiations of remedy change with EPA Region VII and MDNR, including National Remedy Review Board review process. This included coordination with private and public co-PRPs and management of substantial public interest in remedial selection process.
- Negotiated revised RCRA post-closure permit to facilitate full transfer of site authority to MDNR (from shared EPA Region VII / MDNR approach) and implement corrective action objectives for 1,4-dioxane plume extending on and off site.
- Represent purchaser of portion of closed Kansas City industrial facility, including negotiations with EPA Region VII to remove parcel from RCRA Corrective Action permit. Successfully confirmed limited groundwater monitoring as extent of future remedial obligations to MDNR.
- Significant multi-party Superfund experience representing clients at all stages, from start of information request and site investigation, through allocation, and through management of long-term O&M. This has included coordination of PRP groups and agency negotiations, resolution of Natural Resource Damage Claims and negotiation of settlements providing for participation and cash-out funding.
- Advising party in coordinated RCRA Corrective Action at industrial facility, where Region VII has agreed to delineate corrective action responsibilities in accordance with negotiated terms of current and past owner.
- Negotiated Prospective Purchaser Agreement and RCRA Consent Agreement with EPA Region VII to resolve liability for on-site and off-site groundwater contamination.
- Represent participant in state led multi-party voluntary cleanup project with oversight by EPA Region VII and Headquarters. Negotiating investigation and remedial framework, including permitting process, for emerging contaminants at project garnering significant public interest and subject to multiple public hearing requirements.
- Serve as PRP group coordinating counsel for site undergoing remediation under CERCLA and RCRA consent agreements, including work with EPA Region VII on scope and application of technical impracticability waiver, remedy adjustment and ROD amendment.
- Negotiated Consent Decree resolving company-wide enforcement by U.S. Department of Justice under Clean Air Act Risk Management Program, including negotiation of Supplemental Environmental Project and limited audit program.
- Guiding multi-state air permitting strategy to support client implementation of technology upgrades, including support of variance and waiver applications.
- Representing a client in resolution of environmental liability to support wrap up of multi-state oil recycling business, including management of RCRA closure and corrective action, permitted remediation, state tank, and voluntary cleanup program processes and negotiation of property sales.

- Represented client in successful allocation to support the performance of \$50+ million Superfund cleanup including cash-out settlements and negotiation of performing party agreements.
- Obtained summary judgment defeating third party challenge under the National Environmental Policy Act (NEPA) to client's Clean Water Act permit.
- Represented agribusiness client in the transfer and modification of state water rights and land application permits to support increase in water extraction, change in water use and expansion of water discharge through land application.
- Successfully defended industrial facility in administrative hearing challenge to industrial wastewater and storm water discharge permit.
- Managed nationwide compliance disclosure filings pursuant to state and local environmental permits for industrial client, coordinating more than 100 filings annually.
- Obtained summary judgment for client barring contribution claims following a de minimis settlement with the U.S. Environmental Protection Agency.
- Defended utility Clean Air Act construction permit from challenge by Sierra Club through administrative hearing, and represented numerous industrial sources in response to challenges to Part 70 Permits.
- Advise clients on evolving requirements applicable to management of coal combustion residuals and worked with industrial and waste management clients to prepare comments to state draft rules.
- Negotiated industrial water discharge permits with state and federal agencies as well as local wastewater treatment authorities, including incorporation of compliance schedules, variances and toxicity compliance demonstrations.
- Negotiated allocation of environmental liabilities and water rights to support transfer of defense property to private operator.
- Supporting clients in management of water rights including transfer, modification and division of water rights administered by the Kansas Department of Agriculture.
- Represented builders and developers in resolution of storm water enforcement.
- Negotiated settlements including supplemental environmental projects to resolve enforcement of a wide variety of environmental claims including TSCA, FIFRA, RCRA and EPCRA.
