## Overview

**Julie Jorgensen is an accomplished litigator with more than 25 years of experience trying matters in state and federal courts. She has extensive experience representing clients in professional liability, and represents a variety of professionals regarding claims of errors or omissions in the performance of their duties. Julie regularly represents architects, engineers, accountants, attorneys, and real estate professionals, including property managers.**

Julie also represents clients in construction defect matters, a passion that started early with her father working in construction and it has remained an area of interest for her since she saw her first big yellow bulldozer.

Distinguished for exceptional management of cases at inception, Julie works to build a pathway for an ideal outcome during the earliest stages of every dispute through early investigation and digging into the vast array of documents that every construction project creates.
