

SpencerFane®

Environmental Cleanups

OVERVIEW

We represent clients in all manner of environmental cleanup sites, including RCRA corrective action, CERCLA, state voluntary programs, and Brownfields. We use our in-depth knowledge of state and federal cleanup goals and policies such as risk-based cleanup standards, presumptive remedies, vapor intrusion models, and others to demonstrate that practical cleanups are possible and to persuade regulators to accept those proposals. This saves our clients time and money and keeps their projects on track.
