SpencerFane®

Technology and Software

Mastering quickly multiplying complexity.

The field of internet law is both technically complex and growing at the pace of Moore's Law – the maxim that the number of transistors in an integrated circuit doubles about every two years. Spencer Fane Technology and Software lawyers are quick learners and inspiring teachers – keeping clients on the cutting edge of the laws and regulations governing internet technologies.

Overview

Passionate about technology, the law, and moving internet and software businesses forward

With deep knowledge of both internet law and the technologies driving it, members of our team address the full range of legal issues that affect companies with an online presence.
